Self-employed

App developer Travel App

May 2024 - current | Asia

- Find a problem in the world and building an app to try to fix it
- Create a fully functional Next.js app that allows people to find local experiences around the world based on shared interests while traveling
- Making the app extremely well structured
- Message system between two or more users, listing a tour, deleting it, reserving it, Search system, liking a tour
- Doing all this app while travelling, doing muay thai, and not going to parties to improve my chances of getting a better future

Self-employed

App developer Local Events app

December 2023 - current | Prévost

- During my last year of school I made an event and clubs in your area app to help young people meet people who share the same passions as they do. App made using React
